To qualify for consideration, submissions must meet the scholarship standards within the appropriate discipline. Contributions should be not more than 25 double line pages or 8,200 words in length. We also require that manuscripts adhere to the journal's formatting and reference styles as indicated below.

Submissions accepted for consideration will be evaluated anonymously by at least two external reviewers. We expect the content of all manuscripts to be original and the article must not have been submitted or accepted for publication elsewhere. Therefore, authors should include a statement in their submission declaring that the manuscript is not multiple submissions, or has not been published and is not under consideration for publication by another journal.

Articles should include a brief (300 words or less) abstract, and a short biography (100 words or less) with author's full name, title, current affiliation, and a brief description of recent work. Articles may be submitted as email attachments to:

Please be sure to label the CD with the author's name, email and mailing addresses, and the file name and format. Wherever possible, correspondence between the editors and authors will be done by email.

In order to ensure that submissions are evaluated anonymously, every article must include a separate title page with author's full name, title, and current affiliation. The final publication depends on the quality of the manuscript, the associated peer review process, and the number of manuscripts that have already been accepted. The journal will attempt to publish manuscripts no later than six months after submission.

Formatting

Authors are asked to strictly limit their use of underlining and bolding. Please keep tables and graphs to a minimum. If such items are essential, they must be sent grayscale (black and white) in .gif or .jpg format as separate files. Please indicate placement preference by using the notation: [insert table 1.gif here]. The editorial staff reserves the right to determine inclusion or to change the size or placement of all graphics.

Call for Papers

All articles should have page numbering, and there should be no section breaks. Margins should be at least 1 inch wide on all sides.

Endnote Style

We require the use of endnotes and not parenthetical citation. There should be only one endnote per sentence. Therefore, all references in one sentence should be consolidated into one endnote and placed properly at the end of that sentence. An endnote consists of two linked parts, the number mark in the text and the corresponding note at the end of the text. All endnotes must be inserted automatically as generated by a word processor program such as Microsoft Word, Word Perfect, etc.
