

My name is Shirley Lapole and I work in Code 800, Suborbital and Special Orbital Projects Directorate, at NASA's Wallops Flight Facility. NASA Wallops has 2 vacancies in Code 840, Range & Mission Management Operations, available for engineering students through the Pathways Intern Program. The announcements for these positions is available on USAJobs through October 14, 2020.

NASA Wallops is hosting a virtual session for faculty and students (if interested) on Monday, October 5th from 12 – 1 to let you know more information about these opportunities as well as answer any questions you may have about the opportunities available. Is this something that your school would be interested in participating in? If so, I can get you more information about the session we will be hosting on Monday.

If you have any questions please let me know.

Thank you!
