GENERAL INFORMATION

SECTION I

Historical Sketch

Dean of the Business School

Christine Phillips, President

The College

The College of Business Administration of the University of Maine is located in Orono, the county seat of Somerset County, the heart of Maine's agricultural region and home to the University of Maine. The College is housed in two buildings: Axelrod Hall and the Joseph E. Brown Business Administration Building.

The College offers undergraduate and graduate programs in accounting, finance, management, marketing, and economics. The College also offers a variety of minors and concentrations in business-related fields.

History

The College was founded in 1956 as the College of Business Administration. In 1968, the College was renamed the College of Business and Economics. In 1980, the College was renamed the College of Business Administration.

The College is accredited by the AACSB (Association to Advance Collegiate Schools of Business).
The library is modern and comfortable. It caters to the students’ needs and expectations. The library is also equipped with a variety of resources, including books, journals, and online databases.

Located on the first floor of the Agriculture Building, the library is a central hub for research and study. The spacious reading rooms are equipped with comfortable chairs and tables, and the collection of books and resources is comprehensive, covering a wide range of fields.

The library is open from 8 AM to 10 PM, Monday through Friday, and from 1 PM to 10 PM on weekends. It is a quiet and serene place, ideal for focused study and research.

The library is also equipped with a variety of technological resources, including computers, printers, and scanning equipment, making it a valuable resource for students and faculty alike.

In addition to its traditional resources, the library also offers a variety of online resources, including databases and journals, which can be accessed from anywhere with an internet connection.

The library is committed to providing a welcoming and supportive environment for all students, and is a vital resource for the college community.

The Kenton A. Kendall Chemical Laboratory is a significant building on the campus of the University of California, Berkeley, where numerous courses and research activities take place. The laboratory is named after Kenton A. Kendall, a former professor and dean at the university. The building houses various chemistry labs and classrooms, providing students with a comprehensive education in the field of chemistry. The architecture of the laboratory reflects the modernist style prevalent in the mid-20th century, featuring large windows and a functional design that emphasizes both aesthetics and practicality. The lab is an essential resource for students pursuing degrees in chemistry, offering a dedicated space for both theoretical learning and practical experimentation. The presence of such facilities is crucial for fostering innovation and advancing scientific knowledge.
Schedule of Courses

A schedule of courses is published at the beginning of each semester. Courses begin at 8:00 AM.
SECTION II

DIVISIONS AND CURRICULUMS

SELECTED Reporter, a prominent group of students, has been recognized for its contributions to the school's academic and extra-curricular activities. The group has organized various events and activities, including sports tournaments, cultural events, and social gatherings. These activities provide a platform for students to showcase their talents and skills, fostering a sense of community and engagement.

The school also offers a wide range of curricular and extracurricular activities, including sports, arts, and academic clubs. These activities are designed to cater to the diverse interests and abilities of students, allowing them to pursue their passions and develop their potential.

In addition, the school has a strong emphasis on academic excellence, with a focus on rigorous instruction and personalized support. The school's faculty members are committed to fostering a learning environment that encourages critical thinking, problem-solving, and creativity.

The school's mission is to provide a well-rounded education that prepares students for success in higher education and in life. The school's values include integrity, respect, and responsibility, and these values are integrated into the school's curriculum and daily operations.

The school is dedicated to creating a safe and inclusive environment for all students, where everyone is encouraged to reach their full potential. The school's commitment to diversity and inclusion is reflected in its policies and practices, ensuring that all students have equal access to opportunities and resources.

Overall, the school is a vibrant and dynamic community that values education, personal growth, and student well-being.

SPECIAL FEES

Tuition and Fees

Tuition fees for the current academic year are as follows:

- Primary: $12,000
- Lower Division: $14,000
- Upper Division: $16,000
- Senior: $18,000

Fees are payable in two installments: half due at registration and the remaining half due by the end of the first semester.

The school also offers financial aid and scholarships to eligible students. Students interested in applying for financial aid should contact the school's financial aid office for more information.

Examination of the Quantitative Function.

1. Plane Geometry (9)—Three Lectures.

2. Solid Geometry (5)—Three Lectures.

3. Algebra (5)—Three Lectures.

Mathematics

The fundamentals of the function of the triangle and the algebraic function of the square root are the basis of the fundamentals of geometry and algebra.

Physics

The principles of the function of the triangle and the algebraic function of the square root are the basis of the fundamentals of geometry and algebra.

Chemistry

The principles of the function of the triangle and the algebraic function of the square root are the basis of the fundamentals of geometry and algebra.

Physical Sciences and Mathematics
Psychology

The study of the mind, thought processes, and behavior. It involves the analysis of mental processes, emotions, and the ways in which individuals react to their environment. Psychology is used to understand and explain human behavior and mental processes, and to develop theories and models to predict and control these phenomena. Psychology is also used to treat mental disorders and to improve the quality of life for individuals and societies.
