

LINDA CURETON, PH.D.

Dr. Linda Cureton stands as a beacon of leadership, innovation, and dedication to public service. With more than four decades of experience in information technology and organizational leadership, she has consistently broken barriers and set new standards in both the public and private sectors. A proud alumna of UMES, Dr. Cureton earned her Ph.D. in Organizational Leadership in 2020, complementing her earlier academic achievements—a B.S. in Mathematics from Howard University and a master's degree with a post-master's certificate in Applied Mathematics from Johns Hopkins University.

In 2013, she founded Muse Technologies, Inc., a woman- and minority-owned small business that delivers transformative IT consulting services to government clients and industry partners. Under her leadership, Muse Technologies has become synonymous with excellence in leadership development, program management, and organizational efficiency.

Dr. Cureton's unwavering support for UMES is evident through her consistent contributions, as highlighted in the university's Donor Roll Calls from 2020 to 2023. Her generosity and commitment to education exemplify the values that UMES holds dear. We are honored to spotlight Dr. Linda Yvette Cureton—a visionary leader, dedicated alumna, and steadfast supporter of the University of Maryland Eastern Shore.
