2000 Initiation Dinner Program

Engineering Society of Baltimore • Engineering Center
November 6, 2000

Iota Lambda Sigma Society

Nu Chapter: Maryland

Welcome

We congratulate all the new initiates. Their selection as IBS members is a recognition of their status as individuals who have demonstrated outstanding qualities of leadership in the areas of Career and Technology Education and Workforce Development in business and industry.

IBS Nu Officers & Board

A Bright Future

The Department of Industrial and Occupational Education chartered Nu Chapter more than fifty years ago at the University of Maryland, College Park. The Chapter was initiated as a college based chapter of the fraternal organization at that time. During Nu Chapter's forty-year history as a college chapter, 1941 to the present, more than 900 individuals have been initiated into the organization.

The 2000 Nu Class is the first group of new initiates since 1993. The class marks an important new beginning for Nu Chapter. IBS Nu Chapter will become an important social and political force in the development of Maryland's world class Career and Technology Education and Workforce Development programs in the future. We look forward to the contributions the new initiates will make to the achievement of Nu Chapter's mission and goals.

The Class of 2000

The Morris Tischler Class of 2000

By tradition, each Iota Lambda Sigma class of initiates is named to honor the work of an individual who has made extraordinary contributions to the development of Career and Technology Education.

This year we honor the work and contributions of Morris Tischler, student, author, entrepreneur, business leader, social activist, inventor, technologist, and fellow Career and Technology Educator. His work and leadership in education is recognized nationally and worldwide. He is truly a model professional, and we are proud to recognize him as person worthy of having a Nu Class named in his honor.
